The hydrants installed in the village and owned by the village cannot be operated by anyone other than the members of the fire department or the Village of Beach Park Public Works Department. The operation of the hydrants by others may lead to damage of the water system and could lead to significant repairs. Anyone using the hydrants can be fined and would be liable to pay for any damage.

If you need to use a hydrant for construction or other purposes, please contact the Village of Beach Park Public Works Department at 847-746-1770 who can answer any questions.
